

The new boat on the fjord cruise Flåm- Gudvangen and Gudvangen-Flåm

The vessel is created to give tourists a new type of sightseeing experience. The design is inspired by a typical Norwegian mountain trail, twisting and turning up the steep mountain sides. On the boat passengers are free to explore the whole outer deck on “trails” surrounding the passenger lounge. Here you can take a walk on the boat while enjoying the scenery around you. The vessel is developed for hybrid electrical propulsion.

The ordinary boat on the fjord cruise Flåm- Gudvangen and Gudvangen-Flåm

The ordinary vessel is a traditional boat on this part of the fjordcruise journey with both an upper deck and a lower deck for the tourists as well as cafeteria and outdoor seats. This boat is running calm and using some more time on the fjord than the new vessel.
